French Norms

The norms comply with the new European Norms for private mailboxes. Since 1st January 2008 have been in force some change in conformity to the Minister Decree published in Belgium Official Gazette of 1st June 2007.

Position/Access/Opening:
The letterboxes must be located at the border of the street. In case of more than four users, the letterboxes can be placed on the door and at the ground floor, in an illuminated zone with an easy access. The access must be safe and the opening box at least 23 cm (width) and 3 cm (height).

Sizes/Height/Numeration:
The letterbox must receive an envelope 229x324mm with thickness 24 mm. It must be located between 70 and 170 cm (height).
The numeration has to be visible by the street and well illuminated in spite of darkness. If there are more letterboxes with the same civic number, the numbers must be clear, situated over or near the boxes following a logical order.
